An informal meeting for research and review of the situation with the two rock piles (hazards to navigation) that are to be moved under CT DEEP COP to provide a protective “cornerstone” for the living shoreline proposal for restoration of a significant portion of Thatchbed Island. In addition, the stakes marking the placements of the rocks as well as the proposed placement of Envirotubes were viewed as they outline the area that is covered under the Structure/Dredge/Fill Wetlands permit we have applied for. Rich Snarski’s botanist review that was recently completed as requested by DEEP.

There were no motions or action taken.
