

Water Main Replacement Main Street (Rt. 602) Centerbrook/Ivoryton

Project scheduled to start week of April 10th

Connecticut Water will be replacing approximately 1.2 miles of 60 year old water main on Main Street (State Route 602) in Centerbrook/Ivoryton. The work will occur from Deep River Road (State Route 154) through Ivory Street.

The initial section of the project **between Cumberland Farms and Essex Elementary School** will require night work to minimize traffic congestion and help ensure public and worker safety. **This work is scheduled from April 10th through April 14th between 7 p.m. and 7 a.m.**

Starting the week of April 18th, work hours will be 7 a.m. to 6 p.m., Monday through Friday. Work hours may be slightly adjusted for the remainder of the project based on coordination between the CT DOT and the Town of Essex. Project completion is expected in August 2022.

Driveway access in the construction area, including all access drives to Essex Elementary School will be maintained throughout the project.

The new pipe will improve water system reliability and increase the flow of water available to fire hydrants.

Any planned necessary service interruptions and other information related to the night work will be communicated directly to impacted customers at least 48 hours prior to the interruption. To make sure we have the contact info on file that's best for you, visit ctwater.com/notifications or call us at 1-800-286-5700.

Connecticut Water is proud to deliver quality water and service to 105,000 customers, or about 350,000 people in 60 Connecticut towns.

Safe, reliable water provides for public health, public safety and economic development for customers and the communities we serve.
